

如果遇见了 Precise Event Based Sampling (PEBS) is not supported. Please choose non-PEBS event

的问题：

首先勾选 Collect PEBS data

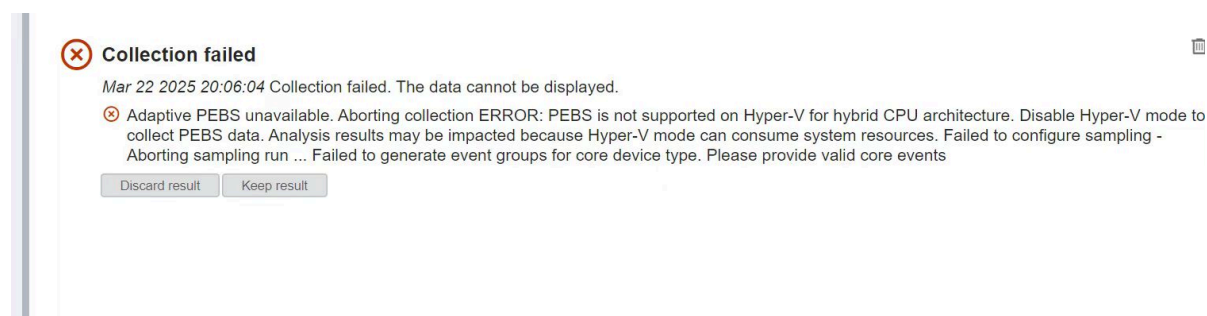

My comments...

☒ Collect PEBS data

☐ Collect stacks

然后会出现一下报错：

Collection failed

Mar 22 2025 20:06:04 Collection failed. The data cannot be displayed.

Adaptive PEBS unavailable. Aborting collection ERROR: PEBS is not supported on Hyper-V for hybrid CPU architecture. Disable Hyper-V mode to collect PEBS data. Analysis results may be impacted because Hyper-V mode can consume system resources. Failed to configure sampling - Aborting sampling run ... Failed to generate event groups for core device type. Please provide valid core events

Discard result Keep result

这个就可以参照以下的pdf解决：

[如何在电脑上关闭Hyper-v\(2\).pdf](#)
